PROFILE

Software Engineering undergraduate with practical experience in developing web applications through academic and personal projects. Experienced in frontend development, backend implementation, database integration, and building functional software solutions. Familiar with software development practices and collaborative project environments, with a focus on creating reliable and user-friendly applications.

EDUCATION

BSc (Hons) in Information Technology, Specializing in Information Technology, Sri Lanka Institute of Information Technology (SLIIT) 2023 – Present

G.C.E Advance Level Physical Science Stream, H/Walasmulla National School 01/2017 – 11/2020

PROJECTS

Ledgerly – Personal Finance Tracker & AI Money Insights 🔗

Tech: React.js, TypeScript, TanStack Start, Supabase, PostgreSQL, Tailwind CSS, Google Gemini AI, GitHub Actions (CI/CD), Vercel

- Developed a full-stack finance platform with 8 user-facing routes, 22 server functions, 6 PostgreSQL tables, secure authentication, budget management, recurring transactions, CSV import, PDF reporting, and AI-powered financial insights using Google Gemini.
- Engineered a secure backend architecture using Supabase PostgreSQL, Row-Level Security (RLS), Google OAuth, and type-safe server APIs, ensuring protected user data access across multiple finance modules.
- Built 2 GitHub Actions CI/CD workflows for automated linting, TypeScript validation, production builds, and controlled database migration deployment, with Vercel handling continuous production deployment through GitHub integration.

Luxury.lk – Online Clothing Store Platform 🔗, Individual Project - Completed

Tech: Next.js, React.js, TypeScript, ASP.NET Core 9, SQL Server, Tailwind CSS, JWT Authentication, Google OAuth, Entity Framework (EF Core)

- Engineered a full-stack e-commerce platform with customer and admin portals to manage products, categories, inventory, orders, and user accounts.
- Implemented secure authentication workflows including JWT authentication, Google OAuth, OTP email verification, and role-based authorization for multiple user roles.
- Created 30+ REST API endpoints and integrated CRUD operations for product management, order processing, stock tracking, and user administration.

TravelEaseLK – Full-Stack Travel & Tour Booking Platform 🔗, Individual Project - Completed

Tech: Next.js, React.js, TypeScript, ASP.NET Core 8, SQL Server, Tailwind CSS, JWT Authentication, Entity Framework (EF Core)

- Architected a full-stack travel booking solution with customer and admin dashboards for managing packages, destinations, bookings, blogs, and users.
- Integrated 30+ API operations for authentication, package management, booking workflows, content management, and dashboard functionalities.
- Implemented scalable backend services using ASP.NET Core Clean Architecture with JWT security, role based access control, and file upload support.

UniShare - Online Resource Sharing Platform [↗](#), *Group Project - Completed*

Tech: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, REST APIs

- Built the User Management module for a collaborative academic platform supporting student registration, authentication, profile management, and account security.
- Implemented JWT-based authentication, role-based authorization, password management, and secure API integration for user access control.
- Designed and integrated 10+ user-related REST API operations with MongoDB to manage user profiles, authentication flows, and platform interactions.

Osethra - Hospital Management System [↗](#), *Group Project - Completed*

Tech: React.js, Material UI, Node.js, Express.js, MongoDB, Mongoose

- Contributed to an enterprise healthcare management system supporting 5 user roles including Admin, Doctor, Pharmacist, Nurse, and Receptionist.
- Implemented the Appointment Management module with features including appointment scheduling, doctor allocation, patient information handling, status updates, and appointment filtering.
- Integrated React components with 15+ REST API endpoints and MongoDB services to streamline hospital appointment workflows and improve operational efficiency.

TECHNICAL SKILLS

Programming Languages

C#, JavaScript, TypeScript, Java, Python

Backend Technologies

ASP.NET Core, Node.js, Express.js

Frontend Technologies

React.js, Next.js, HTML5, Tailwind CSS

Databases

MySQL, MongoDB

Tools

Figma, Visual Studio Code (VS Code), IntelliJ IDEA, Postman, Drow.io

Concepts

OOP Concepts, Agile Development

Version Control

Git, GitHub

SOFT SKILLS

- Team Collaboration
 - Leadership
- Problem Solving
 - Communication
